EDUCATION

University of Petroleum and Energy Studies <i>Bachelor of Technology in Computer Science, specialization in AI/ML, GPA: 9.18/10</i>	Dehradun, UK Aug 2022 - May 2026
Ess Ess Convent Sr. Secondary School <i>Grade 12, 91.8%</i>	Agra, UP 2022
St. Peter's College <i>Grade 10, 95.67%</i>	Agra, UP 2020

EXPERIENCE

Project Intern - Intelligent Automation <i>Oracle</i>	Jan 2026 - Jul 2026 <i>Hyderabad</i>
- Automated 50+ UI validation workflows using Java, Selenium, and TestNG, reducing manual effort across regression cycles. - Designed a novel 7-tuple based prioritization approach to support data-driven test selection and execution planning. - Analyzed validation results and reproducible defect patterns to support release quality and software development lifecycle decisions.	
Intern <i>IBM</i>	Jun 2025 - Aug 2025 <i>Remote</i>
- Built an NLP-based resume parser with 92% accuracy across 500+ resumes. - Supported model deployment for an ATS scoring system to rank candidate-job relevance in resume screening workflows.	

PROJECTS

Adaptive Traffic Signal Simulator Using RL <i>Python, SUMO, DQN, CNN</i>	Jan 2026 - Apr 2026
- Built an RL-based adaptive traffic signal controller in SUMO, trained for 10,000 steps. - Trained a DQN policy across 117 traffic states to support queue-aware signal decisions.	
Poaching Detection System <i>Python, YOLO, Raspberry Pi, AWS EC2</i>	Aug 2025 - Dec 2025
- Designed a YOLO-based real-time detection pipeline on Raspberry Pi with AWS cloud computing deployment support. - Reduced false alerts by combining motion sensor triggers with clustering-based filtering. - Configured automatic 20-second alert video capture when motion or potential poachers were detected.	

PAPER

Adaptive Traffic Signal Optimization Using Reinforcement Learning	May 2026 - Present
- Developing an RL-based traffic signal control framework using SUMO simulations and DQN decision-making. - Modeling queue length, waiting time, and traffic-state transitions for adaptive signal timing across intersections. - Evaluating DQN performance against fixed-time control policies for congestion reduction and scalable traffic management.	

TECHNICAL SKILLS

Languages: Java, Python, C++, MySQL, HTML/CSS
Testing: Selenium, Playwright, TestNG, Regression Testing, Test Automation
AI/ML: Machine Learning, Deep Learning, Computer Vision, NLP, Reinforcement Learning, DQN, YOLO, Data Analysis
Applied AI: CNN, OpenCV, Simulation
Generative AI: LLMs, RAG, Prompt Engineering, AI Evaluation, Model Evaluation
Cloud/DevOps: Azure AI, Docker, Kubernetes
Libraries: pandas, NumPy, Matplotlib, OpenCV

CERTIFICATIONS

Microsoft Azure AI-102: Designing and Implementing a Microsoft Azure AI Solution
Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

SOFT SKILLS

Analytical thinking & problem-solving
Collaboration & teamwork
Communication & presentation
Leadership & initiative
Adaptability & continuous learning
